

Short film competition

Key objectives of the competition:

The key objective of this Short Film Competition are –

1. To use the power of audio-visual medium blended with the creativity of young minds to spread awareness about the HIV/AIDS.
2. To initiate a dialogue about the 'threats from HIV and unsafe sexual practices in public discourse.
3. The competition will also enhance awareness and knowledge levels among the students that shall ultimately reflect in the film as an end product.

Expected outcome:

Youth in India are involved in various HIV/AIDS awareness generation activities through Red Ribbon Clubs at colleges across the country. To increase / improve the youth engagement, a short film competition is planned with following potential outcomes:

1. To engage potential filmmakers at college level in both awareness generation and dissemination level.
2. To promote the right content among youth.

Terms and condition:

By participating in the Competition, participants agree to be bound by, and are deemed to have read and understood these Terms and Conditions. General Guidelines:

1. The Competition is only for Indian Citizens.
2. The competition is open to all students of colleges in state of Goa, up to **three** entries per Institution

6. Entry Form and Consent Form are mandatory documents along with the short film (enclosed). All entries for the competition should be submitted at email id: goasacs.shortfilmcomp@gmail.com. /pen drive. An email stating that the entry has been received will be sent to every submission, if in case the contributor doesn't get a revert mail then She/he is requested to contact the officers. The cost of sending any material through courier facility will be borne by the sender and under no circumstances Goa SACS shall pay for any such expenses.
7. The duration of short film should not be **more than 3 minutes.**
8. The film should be shot in **HD/2K only**
9. English Sub-titles (EST) are mandatory for all entries.

Winning films in the competition will be awarded with prize money along with a certificate.

10. The content of the Short Film should be associating with any of the below mentioned thematic areas:

- **Stigma & Discrimination**

Stigma & Discrimination faced by people living with HIV is biggest obstacle in the way of effective responses to HIV. Stigma is still prevailing against the people infected and affected with HIV especially, at work place, healthcare settings and educational institutions. The film should focus upon creating stigma and discrimination free environment and to provide equal opportunities for all. **To know our vision, click at:**

<https://www.youtube.com/watch?v=6D8n1sDFOrQ>

- **Condom Promotion:**

The only mode of prevention available today to stop transmission of HIV through sexual mode is by consistent and correct usage of condom during every sexual intercourse. It not only protects from HIV but also protect from other STIs and unwanted pregnancies. The ultimate objective of the film is to increase the demand of condoms without any social stigma.

<https://www.youtube.com/watch?v=B3C8qf65ysM>

<https://www.youtube.com/watch?v=jaXtZvB0iHw>

- **Sexually Transmitted Infections Treatment:**

As per 2002 ICMR prevalence study of STI/RTI has shown that 5% to 6% of sexually active adult population is suffering from STI/RTI. Individuals with STI/RTI have a significantly higher chance of acquiring and transmitting HIV. Syndromic case management (SCM) with appropriate laboratory tests is the cornerstone of STI/RTI management. This approach classifies STI/RTI into syndromes (easily identifiable group of symptoms and signs) and provides treatment for the most common organisms causing the syndrome. STI Division, NACO branded the Designated STI/RTI Clinics (DSRC) as Suraksha Clinics. The film should promote safe sex and the importance of Suraksha Clinics which provide free counseling and treatment.

<https://www.youtube.com/watch?v=J0yCXenc4zs>

- **Importance of HIV testing:**

The only way to know about individual's HIV status is through blood test. The free and confidential counseling and testing services are being provided by Government of India at government hospitals. Any individual who is indulged in any high risk activities is advised to undertake the HIV testing. This helps in not only knowing the HIV status but also if found positive then the person could be put on treatment. HIV testing will also help us to reach ambitious, but achievable target of 90:90:90: - By 2020, 90% of all people living with HIV will know their HIV status. - By 2020, 90% of all people with diagnosed HIV infection will receive sustained antiretroviral therapy. - By 2020, 90% of all people receiving antiretroviral therapy will have viral suppression.

- **Promotion of free Anti Retro Viral treatment:**

Antiretroviral therapy (ART) consists of the combination of antiretroviral (ARV) drugs to maximally suppress the HIV virus and stop the progression of HIV disease. Huge reductions have been seen in rates of death and suffering when use is made of a potent ARV regimen, particularly in early stages of HIV. People can lead a healthy life for a long time with

appropriate medical care. ART is available free to all those who need it. Public health facilities are mandated to ensure that ART is provided to people living with HIV irrespective of their CD4 count. The film should have a simple take away message that the ART is available free of cost.

- **Adherence to Anti Retro Viral treatment:**

HIV adherence is defined as a patient's ability to follow a treatment plan, take medications at prescribed times and frequencies, and follow advice regarding food and other medications. A high level of adherence is required for antiretroviral therapy to be effective thus the focus on message should be upon the value of adherence to ART for a quality life ahead.

- **HIV & Youth:**

Young people's risk of becoming newly infected with HIV is closely correlated with age of sexual debut. Abstinence from sexual intercourse and delayed initiation of sexual behaviour are among the central aims of HIV prevention efforts for young people. Increasing access to prevention services, including prevention education and access to condoms are essential for young people who are sexually active. In short, how safe behaviour matters in staying away from HIV and STIs should be the core message of the film.

- **Voluntary Blood Donation:**

Non remunerated voluntary blood donation is the safest mode of blood donation as it is of free will of donor to donate the blood and has got much higher chances for being free from transfusion transmissible infection. Voluntary blood donation effectively unites the world in terms of humanity, where definitely the one who helped today will be helped when in need, if we become responsible. The film should promote the value of Voluntary Blood Donation and how a simple step can save lives.

- **HIV & AIDS (P&C) Act, 2017:**

The HIV and AIDS (P & C) Act, 2017 is one of its kind in Indian Health sector and reinstates Human and Fundamental Rights of people infected and affected with HIV/AIDS. The Act addresses stigma and discrimination faced by people living with HIV. PLHIV are discriminated at homes, society, educational, health and professional settings. One of the reasons for stigma is the lack of correct knowledge of HIV. The greatest fear is that of transmission which arises out of myths and misconception. Stigma is expressed in various forms like language, gestures, behaviour, denial of services, harassment, violence etc. Stigma can be broadly characterized into external and internal stigma; the former includes the societal perception while the later defines self-perception and both can stem out of the socio-cultural milieu and en-grained value systems. This Act is a legal way of undoing injustice meted out to this section of society and it has been instrumental in doing double good. One in generating fear psychosis among general population thus, prohibiting them from discriminating PLHIV and other by generating sense of belongingness that there is someone whom they can complain to in case of violation of rights. The film should aim at generating awareness about how the Act empowers people living with HIV. Real life instances, case studies, biographies related to PLHIV who have fought discrimination and interlinking their struggle with major features of the government sponsored Act can be captured on the reel. The film should be able to strike a balance between both the rights and duties.

- **Using national toll free helpline 1097:**

How 1097 is a one window solution to all the doubts related to sexual health, risky behaviors, and after steps of unsafe intercourse! The anonymity and confidentiality of the caller is maintained throughout the call process. Here, trained counselors provide 24 x 7 x 365 call support in 15 regional languages (Hindi, English, Punjabi, Bengali, Telugu, Kannada, Malayalam, Tamil, Odia, Gujarati, Marathi, Assamese, Mizo, Khas i& Manipuri). The toll-free number -1097 can be reached from any landline and mobile phone networks across the country.

Major services provided on the helpline are: information on HIV/AIDS, counseling on HIV/AIDS, referral to HIV/AIDS service facilities and Feedback/Grievance Redressal Service to the callers.

Filmmakers to work keeping the following outcomes in mind (one or more):

- The film should promote safe behavioral practices among Youth.
- The film should provide message to reduce Stigma & discrimination associated with HIV/AIDS.
- The film should motivate and sustain behavior change in a cross section of identified populations at risk, including HRGs and bridge population. The film should help to strengthen enabling environment for PLHIV.
- The film should promote the uptake of HIV testing and the stigma related to that.
- The film should eliminate negative social norms which hamper the access to services.
- The film should enhance awareness and knowledge levels of general population.
